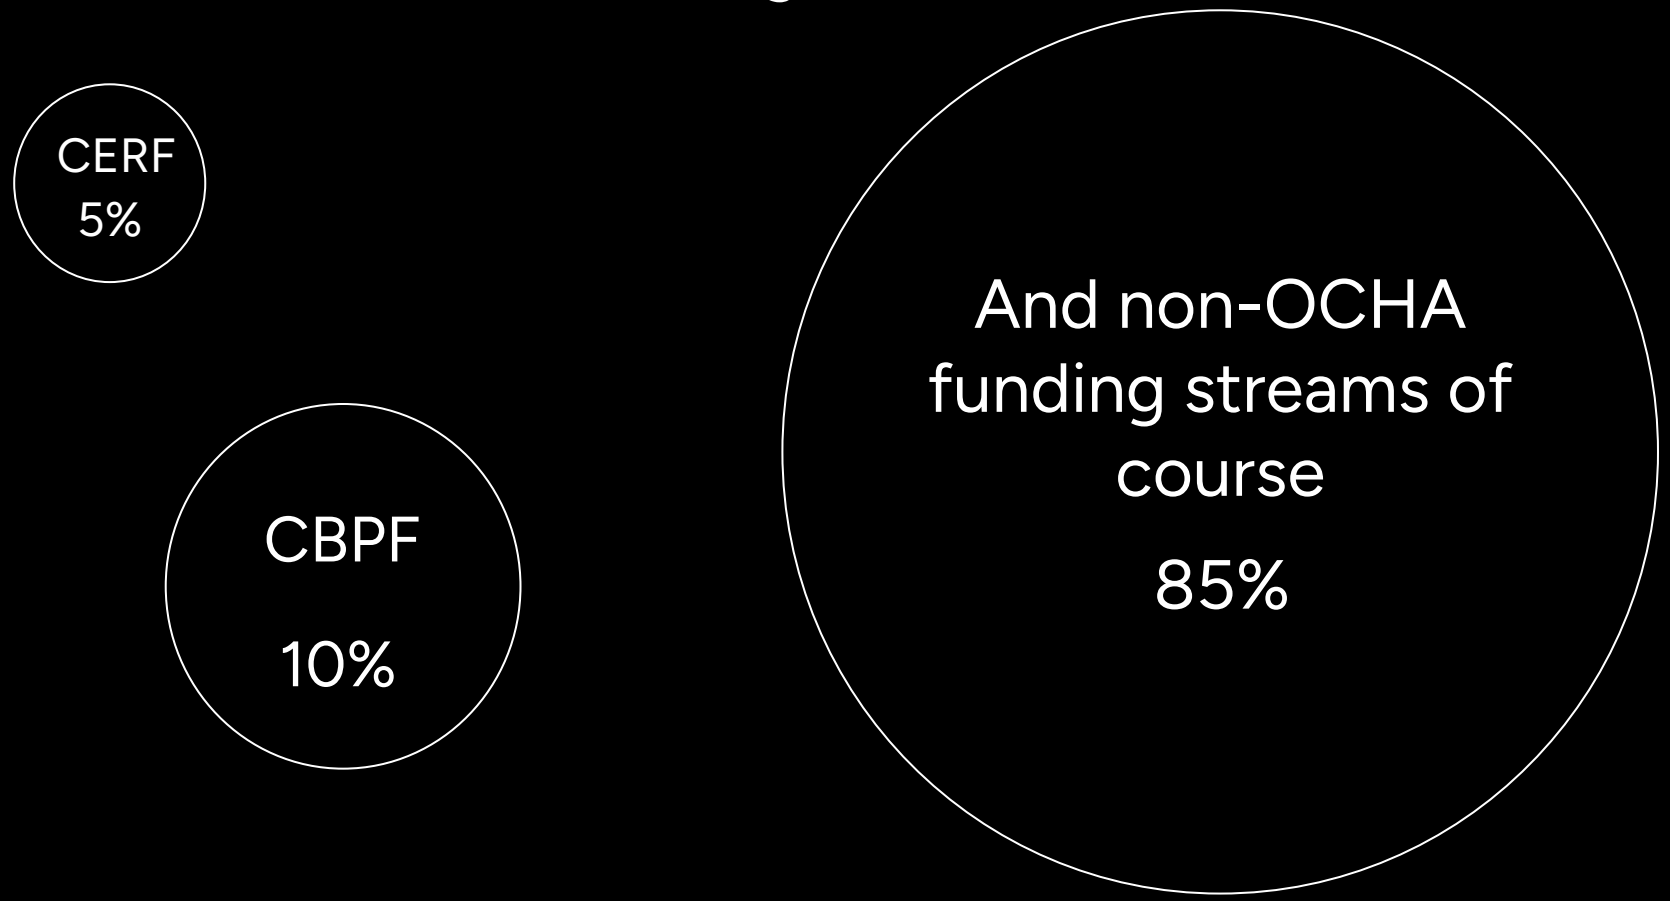
Reduction since US cuts

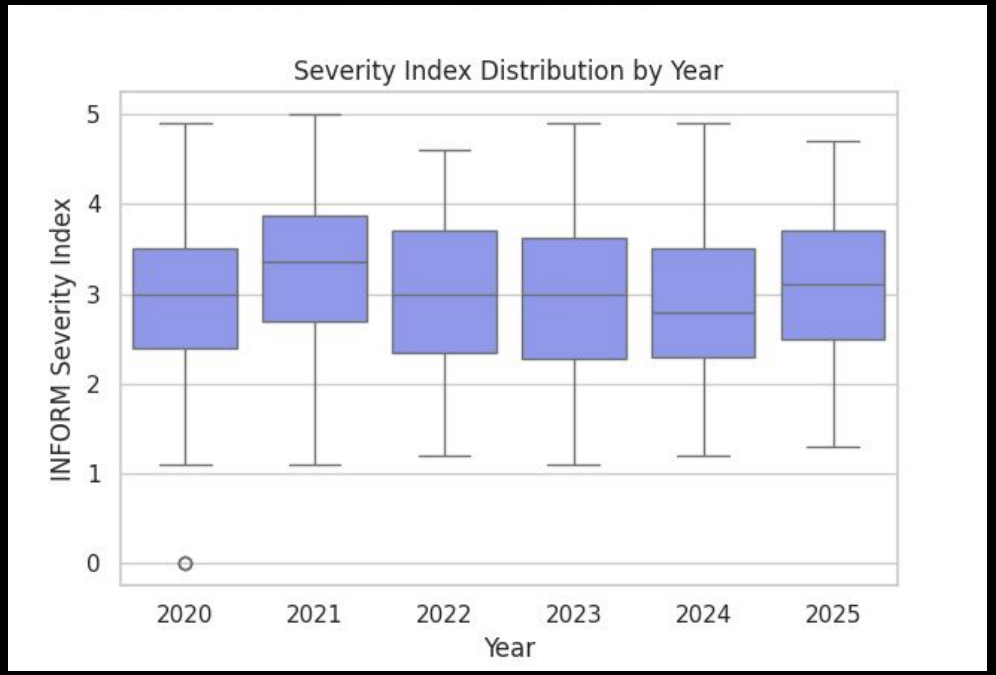
UN OCHA Funding Streams



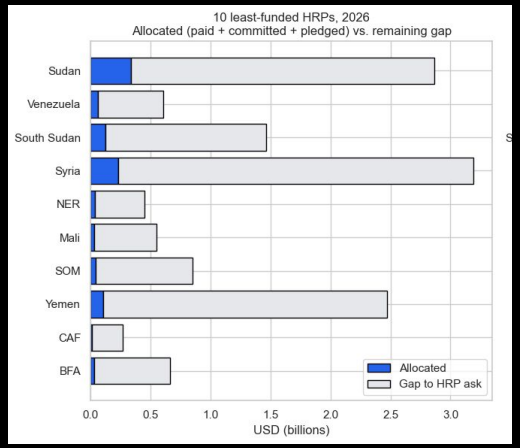
Which crises are most overlooked?

Part 1: Recent Trends

- Africa most prevalent, Middle East most severe
- Funding drop => requirements drop
- Average severity index roughly constant



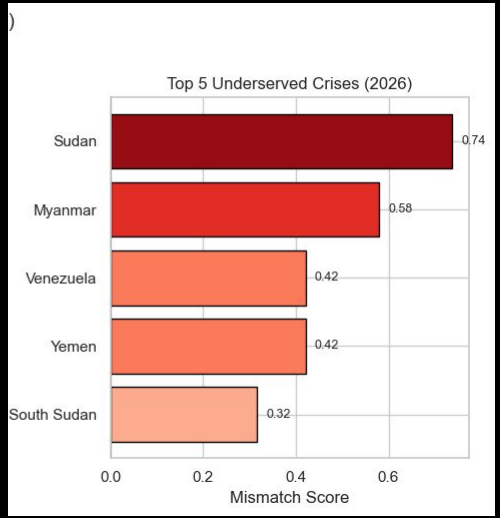
Part 2: Identifying Gaps



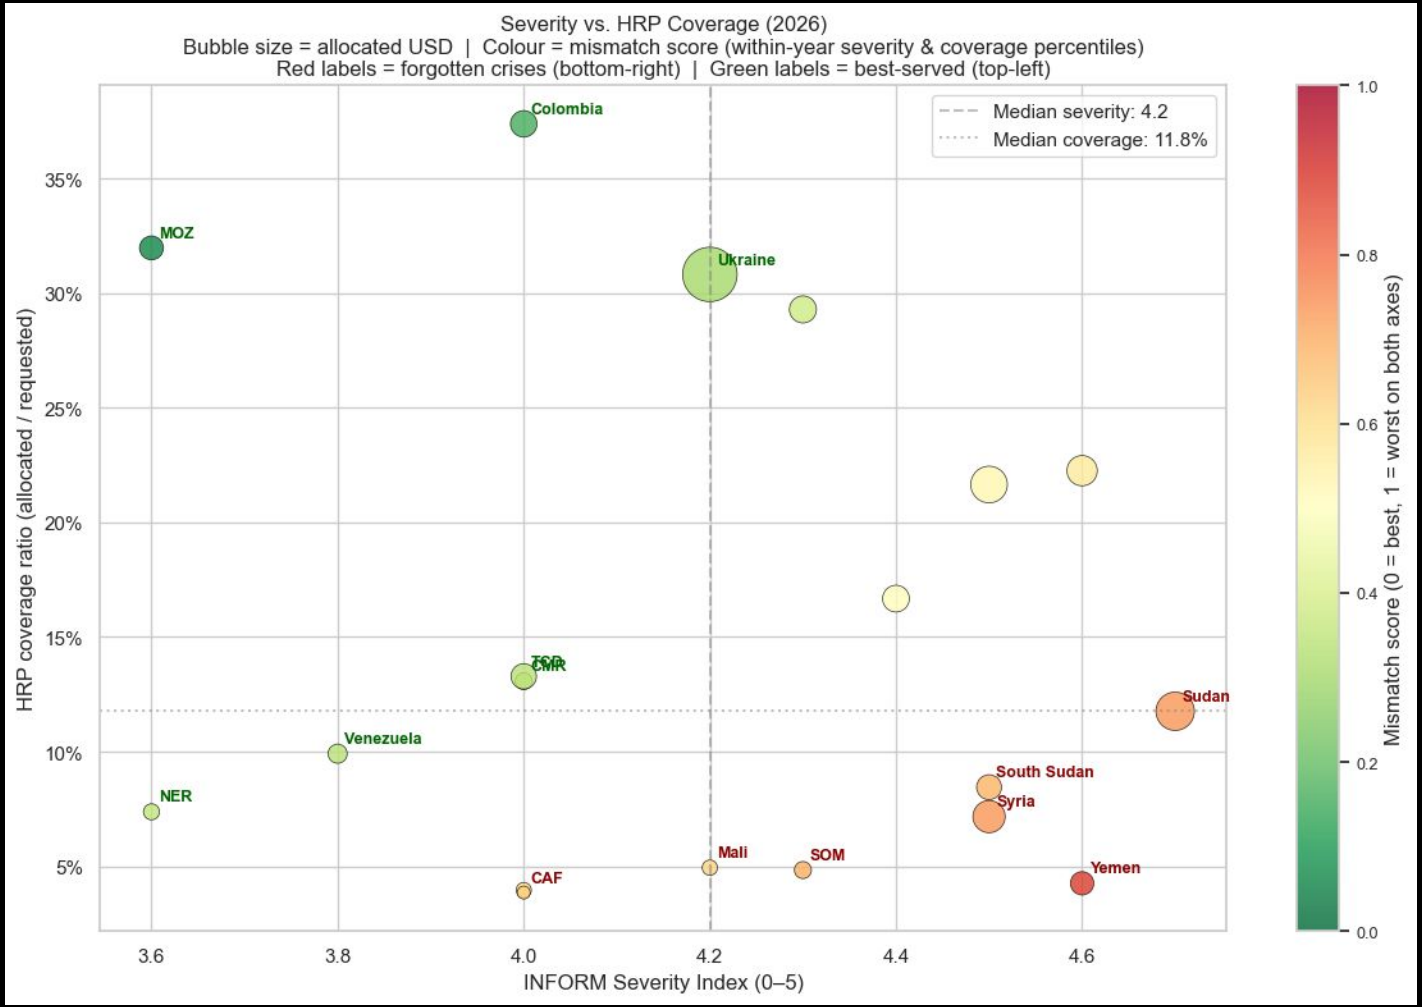
- ➔ Hidden Crises -> Ethiopia
- ➔ Planning gaps -> Sudan
- ➔ Funding gaps -> Sudan

- ➔ Effectiveness gaps -> not quantified

Keep in mind: much variation



The outlier: Ukraine



Severity vs. HRP Coverage (2026)
Bubble size = allocated USD | Colour = mismatch score (within-year severity & coverage percentiles)
Red labels = forgotten crises (bottom-right) | Green labels = best-served (top-left)
Median severity: 4.2
Median coverage: 11.8%

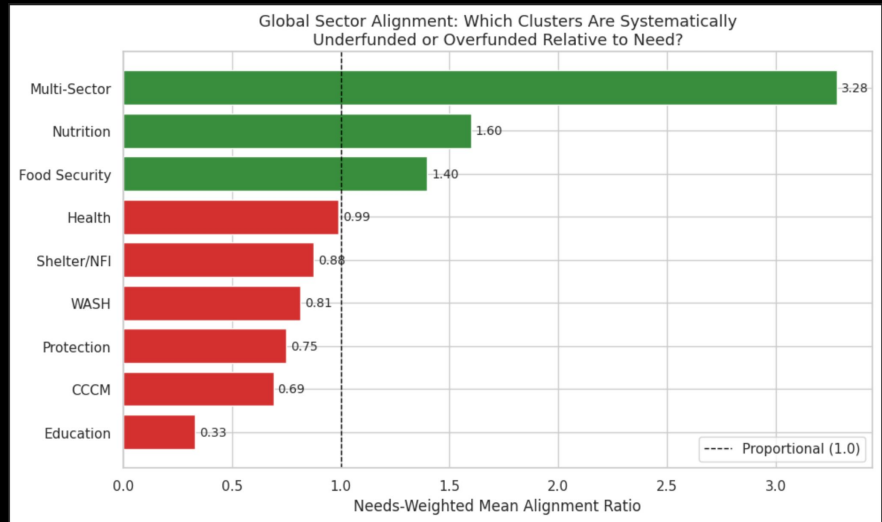
0.0
Mismatch score (0 = best, 1 = worst on both axes)

Part 3: Diagnosing Gaps

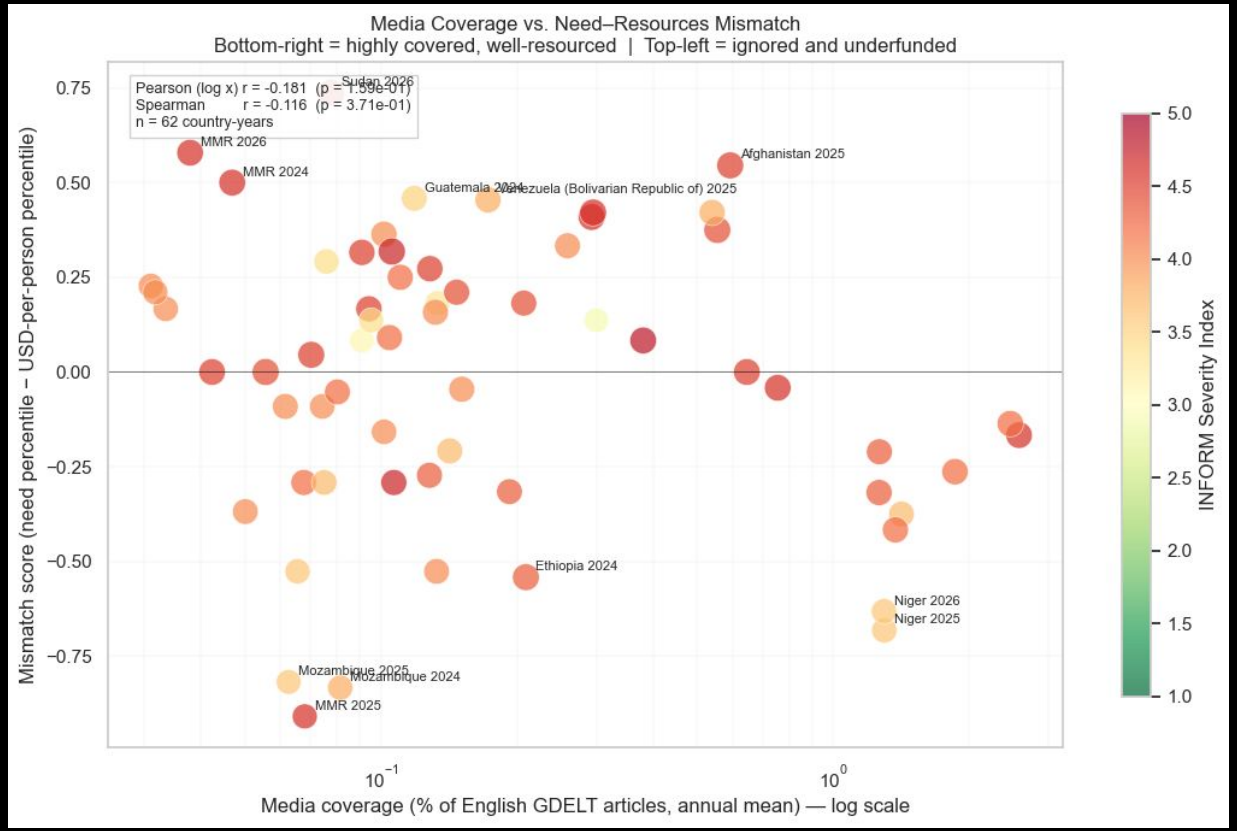
1. CERF Allocations roughly match our conclusions
   But Underfunded Emergencies vs Rapid Response clouded the results
2. All clusters underfunded, except Health, Nutrition & Food Security

3. And one big idea:

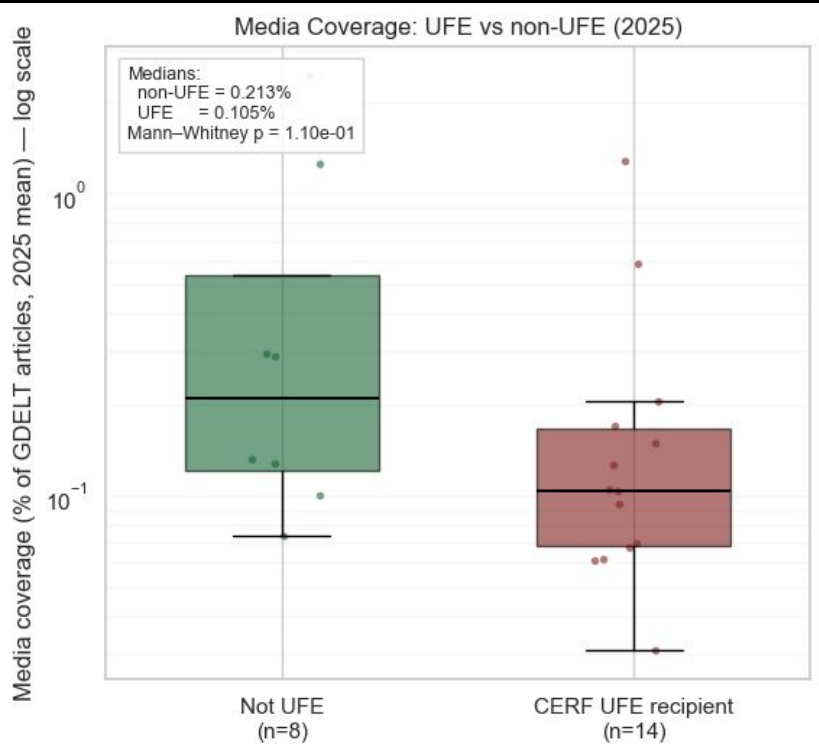


Media

Weak Correlation Overall



But…



Media Coverage: UFE vs non-UFE (2025)
Medians:
non-UFE = 0.213%
UFE = 0.105%
Mann–Whitney p = 1.10e-01
Media coverage (% of GDELT articles, 2025 mean) — log scale

Conclusion: which crises are underfunded?

- ➔ Ethiopia
- ➔ Sudan
- ➔ And a lot of unmentioned…

- ➔ Some positive outliers (but still underfunded)
